Longitude  
-110.96900  
Notes

A skier in Hyalite reported widespread avalanche activity in the Divide drainage. From the email: "Saw this set of crowns just to the looker's left of Divide Peak proper. Appear to be c [cornice](#) triggered, I suspect they all released sympathetically, maybe sometime yesterday. Impressively connected, definite PWL issue. SE as [aspect](#) Crowns spanned nearly 1/2 mile of terrain." Photo: B. VandenBos

Multiple Avalanches  
Number caught  
0  
Number buried  
0  
Number killed  
0  
Avalanche Type  
Soft slab avalanche  
Trigger  
Cornice fall  
Trigger Modifier  
r-A remote avalanche released by the indicated trigger  
R size  
3  
D size  
2.5  
Bed Surface  
O - Old snow  
Problem Type  
Persistent Weak Layer
