Multiple large avalanches in Centennials and Lionhead

CENTENNIAL RANGE Lionhead Range 2/1/2019 Code SS-N-R3-D2.5-O Aspect Range NE-SW Latitude 44.53940 Longitude

From e-mail on 2/1/19: "The Reas Peak area had 7 slides that I could see from the bottom of the drainage, most of them looked to have occurred with the last storm and had a northerly influence to their <u>aspect</u>. The largest and most recent <u>slide</u> I included in the [above photo], Reas Peak is the highest peak on the left in the photo and the <u>slide</u> path is on a NE <u>aspect</u>. If you look close at the photo you can see a 2-3' crown on the far left side of the frame on the north as <u>aspect</u> f Reas from another sl slide

Another observer saw a large s slide near Lionhead (photo) and one on Reas Peak from the same cycle.
