Bison triggered Avalanche in YNP?

Advisory Year

19-20

Out of Advisory Area 12/17/2019 Code SS-AW Latitude 44.92680 Longitude -110.45100 Notes From an email: Upper Elk Creek, E. aspect, 8,200 ft Debris looked pretty fresh, Who knows, but could have been triggered either directly or remotely by bison. The disturbance to lookers left (at bench) is due to bison - they are not cryptic animals! Number of slides Number caught 0 Number buried Avalanche Type Soft slab avalanche Trigger Wildlife **Images** Bison triggered avalanche?
