

Collapsing, cracking and recent natural avalanche in northern Bridgers

Flathead Pass
Bridger Range
2/4/2020
Code
Latitude
45.96840
Longitude
-111.02100
Notes

Skiers around Frazier Basin and also at Flathead Pass reported collapsing and cracking as they skied. From Flathead pass, "Lots of collapses and whumphs. Obvious soft [slab](#) fractures in new and drifted snow. Saw evidence of point release avalanches on steeper terrain around cliffs. Also saw a crown that appeared to have triggered on the new wind loaded snow, NE [aspect](#) . It was approx. 200 feet below a steep rocky ridge."
