Collapsing, cracking and recent natural avalanche in northern **Bridgers**

Flathead Pass Bridger Range 2/4/2020 Code Latitude 45.96840 Longitude -111.02100 Notes

Skiers around Frazier Basin and also at Flathead Pass reported collapsing and cracking as they skied. From Flathead pass, "Lots of collapses and whumphs. Obvious soft <u>slab</u> fractures in new and drifted snow. Saw evidence of point release avalanches on steeper terrain around cliffs. Also saw a crown that appeared to have triggered on the new wind loaded snow, NE <u>aspect</u>. It was approx. 200 feet below a steep rocky ridge."
