

Collapsing, "whumphs" at Bacon Rind

Bacon Rind
Southern Madison
12/22/2018
Code
AS
Latitude
44.96940
Longitude
-111.09700
Notes

From e-mail: "We got 3 whoomphs once we got into the upper meadows, where there was enough snow for a good [slab](#) on top of the facets that make up the majority of the snowpack, down low the snowpack was weak and thin but lacked a supportable [slab](#) . We dug a pit on an east facing slope up high and got an ECTP 15@ 10cm from the ground." Pit attached.

Number of slides
3
