Small natural activity in Beehive

Beehive Basin Northern Madison 12/25/2020 Code Latitude 45.34070 Longitude -111.39100 Notes

From email: "Today we saw a small avalanche that came out of the rocks lookers left of the 4th of July <u>Couloir</u>, too far away to give any details, just a small debris pile. I don't think it was there yesterday, but I could have missed it. We also saw some very small point releases and roller balls on steep south facing slopes."
