

Skier Triggered Avalanche Mount Blackmore - East Face

Mt Blackmore
Northern Gallatin
12/28/2020
Code
SS-ASu-R1-D1-O
Elevation
9500
Aspect
E
Latitude
45.44460
Longitude
-111.00000
Notes

From obs: "Skier Triggered a 1.5' [slide](#) to his right while making a turn near a cliff band. The [slide](#) did not intersect with the skier's path. We did a ECT before choosing our line and were not able to get the soft [slab](#) , or anything else to propagate, but clearly, the [slab](#) is ready to go as it slid on rocks. We both skied out without incident."

Number of slides
1
Number caught
0
Number buried
0
Avalanche Type
Soft slab avalanche
Trigger
Skier
Trigger Modifier
u-An unintentional release
R size
1
D size
1
Bed Surface
O - Old snow
Problem Type
Persistent Weak Layer
