

Near Mt. Wilson -- shooting cracks, whumpfing

Wilson Peak

Northern Madison

1/13/2021

Code

Latitude

45.28440

Longitude

-111.32800

Notes

"Upside-down snowpack, with a ~1ft strong layer on top of a few inches of weak snow. Significant shooting cracks and whoomping in areas with deep snow. There was comparatively little snow in the trees -- not enough to cause avalanche concerns. We stayed off high-angle slopes, because of the clear signs of avalanche danger, and the very warm temps."
