 Slope: **34**
 Wind loading: **no**

Stability on similar slopes: **Good**
 Air Temperature: **C**
 Sky Cover: **Clear**
 Precipitation:
 Wind: **Calm**

HS120
 Stability Test Notes:

Layer note
78-79: Pro

Notes: This pit was dug near the saddle on Palace Butte. Although it was very warm out, the snowpack was still cold. Was surprised to find the nsf on here. New to me. This is the layer I'm most worried about Facets at ground seem to be gaining a lot of strength.
