 Stability Test Notes:
125: slid into pit
 Layer note
125-130: F

Specifics: **Cracking. Recent act on sim slopes. Recent act on diff slopes.**

Notes: We dug this pit on the flanks of the Rasta Chute. The slope adjacent was pulled out by a snowmobiler on 1/23/12. The facet/crust combination is unstable although I got no collapsing or cracking on it. Did not investigate below 88 cm.
