

Snow Pit Profile

Observer: **Eric Knoff**
Sat Mar 02 12:19:00 MST 2013

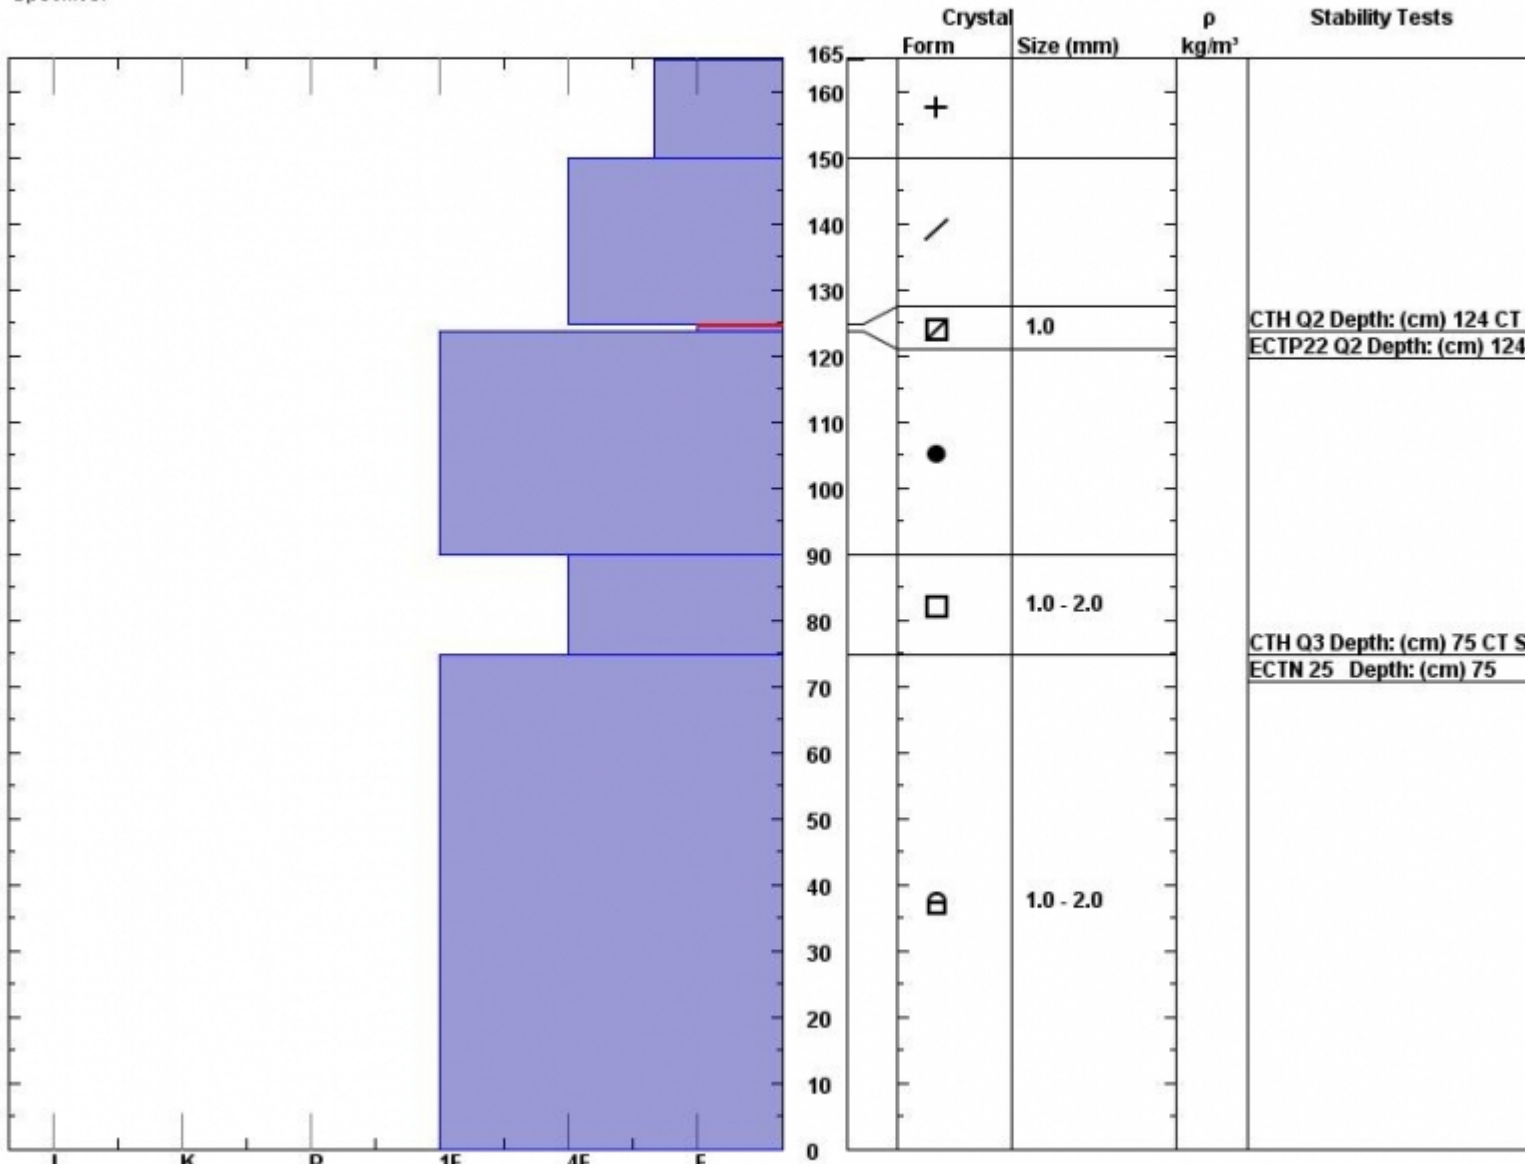

Stability on similar slopes: **Good**
Air Temperature: **F**
Sky Cover: **sky 4/8 to 8/8 covered**
Precipitation: **None**
Wind: **SW Moderate**

Stability Test Notes:

Layer notes:
124-125: F

Bridger Range, MT
Elevation (ft) **8400**
Aspect: **300**
Specifics:

Co-ord: **N W**
Slope: **36**
Wind loading: **no**

Notes: This particular slope had a deep and relatively stable snowpack. We did not get any cracking or collapsing on the NSF layer. As always on the v slope 100 feet away had a totally different structure. As long as the snowpack is more than a meter deep stability seemed good.

Advisory Region
Bridger Range
Bridger Range, 2013-03-02
