

Snow Pit Profile
N of Bacon Rind
southern Madison, MT
 Elevation (ft) **8350**
 Aspect: **95**

Observer: **Mason Young**
Mon Jan 06 18:32:36 MST 2014
 Co-ord: **N W**
 Slope: **23**
 Wind loading: **no**

Stability on similar slopes: **Poor**
 Air Temperature: **C**
 Sky Cover: **sky 3/8 to 4/8 covered**
 Precipitation: **None**
 Wind: **S Light Breeze**

HS75
 Stability Test Notes:
 Layer notes: **27-35: Pro**

Specifics: **Collapsing, widespread. Collapsing, localized. Cracking. We skied slope.**

Notes: We're still most concerned with the fist facets at 35cm even though ECT's propagated on next layer above. CT's didn't fail on this upper layer, and did fail on the fist facets. Several large collapses and shooting cracks occurring on fist facets. We felt nervous on slopes above 27-28 degrees (measured).
